

Valiant Platform Release: What you Need to Know

The following is a quick overview guide of what is coming out in the **2021.05 Release (July 16, 2021)**.

This will help you communicate any updates to the platform.

Smartforce	Product Name for NGA
Valiant Mobile	Valiant's Mobile App for Android and iOS
Legacy	Vision and Vault Platforms

FEATURE/APPLICATION	DETAILS OF THE RELEASE ITEM	PLATFORM
Smartforce International TLM – Phase 1	We have begun the initial phase of building features and functionality to enable international customers to leverage our TLM application in Smartforce. The first part of this project entails adding a validation of UK formatted phone numbers , and future releases will add more address functionality.	Smartforce
Payroll Compliance Updates	Three payroll Compliance updates were made: <ul style="list-style-type: none"> • Added the Q2 2021 941 forms and worksheet • Added the Q2 2021 ADP export format • Added the Q2 2021 Mastertax export format 	Smartforce and Legacy
Jobvite Integration Phase 2	We've now added the additional functionality to our Jobvite integration, enabling clients to add direct deposit account data as part of the information passed over to Smartforce.	Smartforce
Various Fixes and Updates	We also made significant updates and fixes to known issues to further enhance the product, including: <p>TLM Fixes:</p> <ul style="list-style-type: none"> • Fix issue with positions being combined in TLM Schedule at Business Unit level • Assign permission to create contacts for a location to a role so it is available to users • We fixed the handling of Holiday Default records so holiday dates cannot be altered, holidays are pushed to locations, cascade the deletion of location holidays, added the ability to copy existing holidays to future years and cleaned up the UI on holiday screens • Added the option to disable entry of pending punch in time when punching out in mobile if punch in was not previously completed • System will now perform standard scheduling conflict checks when changing a shift time 	Smartforce and Legacy

FEATURE/APPLICATION	DETAILS OF THE RELEASE ITEM	PLATFORM
	<ul style="list-style-type: none"> Fixed the 10-minute rounding rule for time entry Created a 5-minute rounding rule for time entry Enabled a delete functionality in Shift Master Created a screen to show broadcast messages sent with type, method and success/failure with drill-down to see message details Added a TLM Schedule shift Action to clear Check Shift exceptions – effectively a “Confirm Detail” using the best available shift times (actual, scheduled, etc.) Fixed an error with Vision CTTDR report (by adding missing DLST data) Fixed an error when trying to edit invoice due to field size mismatch on employee address <p>Employee Portal Fixes:</p> <ul style="list-style-type: none"> Improve security to prevent non-ESS users from resetting passwords of other non-ESS users Fixed an error when trying to save custom groups E, F and G values in Smartforce Fixed a data filter issue where Employee Personal Profile and Employee Company Profile do not honor data filters on role groups Improved the UI when user forgets their login token in mobile to be more intuitive <p>Employee Fixes:</p> <ul style="list-style-type: none"> Fixed the error when bulk loading employees who have head of household filing status Updated the hierarchy fields when the Business Unit is changed in Quick Hire Fixed a permissions issue to correctly use employee default values to be assigned during Quick Hire Restored the employee accrual balances and daily time fields in ESS Leave Request screen <p>Payroll Fixes:</p> <ul style="list-style-type: none"> Fixed the handling of deductions in Smartforce when 3rd party payee is removed from employee deduction and add actions when editing an employee deduction in a payroll batch to remove/restore a 3rd party check Created a Sage GL Payroll export
